

6 STEPS TO PLANTING YOUR NEW Narrowleaf Milkweed in Pots

(*Asclepias fascicularis*)

1

Re-pot your milkweed
within 7 days.

2

Plant in a 2 gallon or
larger pot, place each pot
3 feet apart.

3

Place pot in full
sun or part
shade.

4

For the first time watering,
fully soak each plant, until
water runs out of drainage
holes.

5

Use all-purpose fertilizer
until plant dies down in Fall.
Follow instructions on
fertilizer of choice.

6

Water when soil is half
way dry. Continue
watering during the
winter.

6 PASOS PARA PLANTAR ALGODONCILLO NATIVO EN MACETAS

(*Asclepias fascicularis*)
